## EXPERIENCE

### Full stack web developer

Proficient in developing a complete full stack web application fully responsive

#### Tasks

- Having around 1 years of experience in practicing full stack web application with MERN stack.
- Ineuron, Bangalore. This is a JavaScript Bootcamp where I have done 20+ Project using Html, CSS, Tailwind CSS and JavaScript. I am currently doing an internship with Developing small and large projects including MERN stack development.
- I have built the home page of Paytm, Shopify, Rode. using only HTML and Tailwind CSS, with proper handwritten code and these webpages are full responsiveness on all screen sizes. (From Mobile to Desktop)

## PERSONAL PROJECTS

### Workout buddy app

- This application was built to track the physical workout done by the user. It keeps track of the workout name, load used in the work out, number of reps done and the date and time of the workout performed. This is a completely responsive webpage works on all screen sizes
- The tools and tech used for this project are. Node JS, Express JS, Mongo DB, React JS and React context for state management

### Blog app

- In this application people can post their articles for others to read. this application also allows the user to edit the article and repost it and also delete the article. The user has to register in the application in order to publish a article in the application but anyone can read the article with the publishers name.
- The tools and tech used for this project are. Node JS, Express JS, Mongo DB, React JS, Tailwind CSS and Nodemailer for the OTP authentication .
